Quick Start Guide

TD3

Dual-Channel TENS Pain Reliever
Unpack TENS device and charge via USB.
Connect output cables to Channel A or Channel B, or both.
Connect adhesive gel pads to output cables.
Remove protective film and attach gel pads to areas of treatment.
Turn device on, then select therapeutic mode. Cycle through modes by pressing the M button.
Increase intensity as needed by pressing the + and – buttons.
If using both channels, the intensity can be selected independently. Just press the A or B button to change channels.
A 20 minute treatment cycle will now begin. To change duration of treatment press the T button.
