BRAND STORY

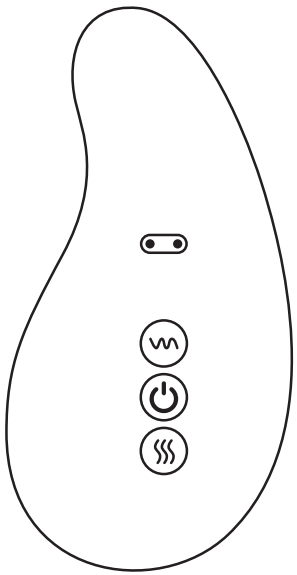

At Kinetik Wellbeing we are driven by the belief that everyone deserves to take control of their health from the comfort of their own home. Designed with simplicity in mind, our clinically validated devices empower you to proactively monitor and manage your long-term health journey.

We created our Women's Wellness range to empower and support women through every stage of life, addressing everything from menstrual discomfort to menopausal symptoms.

INTRODUCTION

Introducing the Lactation Massager, the perfect, compact device empowering new mums during their breastfeeding journey.

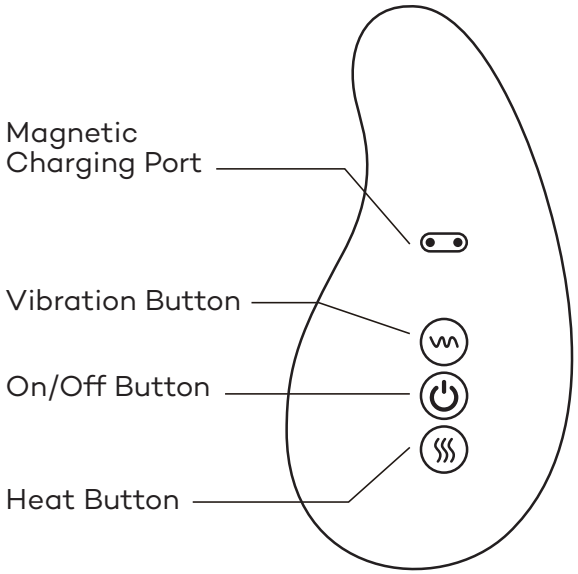

With 10 soothing vibration modes and 3 gentle heat settings, you can customise the combination to ease clogged milk ducts, reduce breast pain, stimulate milk production, and improve latching.

The massager's waterproof design makes it easy to clean and ideal for use in the shower, offering convenience and relief whenever you need it.

Designed for portability and crafted from soft silicone, the Lactation Massager is shaped to fit your breast perfectly, making breastfeeding and pumping easier and more enjoyable for both you and your baby.
